

PDQ · SCORECARD APPENDIX

The seven wrong answers, with their scorecards

One page per clip: what the pod's rules do today, and where each case stands after my changes.

Nada. 27 September 2026. Appendix to the weekly update.

Every printout below was made with the pod's ORIGINAL rules on my 134-film index, so this is what production behaviour looks like on these clips. The status line above each one says what my changed engine does differently.

Krrish 3

Platform: tiktok. Votes: 1 wrong / 1 correct.

Status: REMAINING. Decided by the pre-scan.

index: C:\Users\nadaa\pdq_for_nada\data\index (134 films, 16,744,500 fingerprints, opened in 0.12s, memory-mapped)

clip: C:\Users\nadaa\pdq_for_nada\data\clips\vt_tiktok_com_ZSqBUnAX9_.mp4

[ORCH][PDQ] starting query...
